

Kim Davis, Gladwin, MI.

Subject P-10808-044, Lowering water on Secord Lake

To whom it may concern:

I am writing to express concern because we just learned that an application has been made to allow lowering our water level earlier than the September 20, 2018 date which has been set previously.

We are working with three other neighbors to all pull our boats out the week of September 17th. This has been planned for weeks now. If you change this date it will cause a problem as we are renting the pontoo trailer to manage this. All of the rental companies are booked as well as the companies who hire themselves out.

Please stick with the original date of September 20. For the water drawdown.

Regards,

Gene and Kim Davis
