

Eric MacLaughlin, Beaverton, MI.

The later in the season the better for the lake draw down. Many of us enjoy the lake and boating later into the fall. Also , busy schedules may prevent many of us from removing our boats from the lake before September 16, 2018. Waiting to draw down the lake past September 20, 2018 would better serve the residents around Wixom Lake.

The uncertainty involved in the refilling of the lake could prevent lake levels returning to safe levels before winter sets in. Thus preventing any boats not removed before lakes levels decrease to winter over on the lake.
